Login

When you run SIS, then Login window will appear:

Step1: Input user name

Step2: Input password

Step3: Click , if the user name and password are valid then go to Main Menu;
otherwise, the warning message will appear:

✧ If you click , then you can go to Change Password

Change Password

The image shows a window titled "ChangePasswordForm" with a close button in the top right corner. Inside the window, there are four text labels followed by input fields: "User Name:", "Old Password:", "New Password:", and "Confirm Password:". Below these fields are two buttons labeled "Save" and "Reset". Four callout boxes with arrows point to the input fields, containing the following text: "1. Input User Name" (pointing to the User Name field), "2. Input Old Password" (pointing to the Old Password field), "3. Input New Password" (pointing to the New Password field), and "4. Input New Password Again" (pointing to the Confirm Password field).

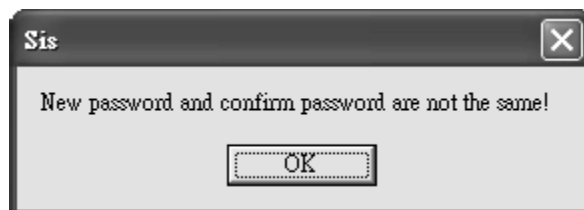

Step1: Input user name

Step2: Input old password, if old password or user name is invalid, then the following warning will appear, otherwise, go to Step3:

Step3: Input new password

Step4: Input the new password again, if the new password and confirm password are not the same, then the following warning will appear:

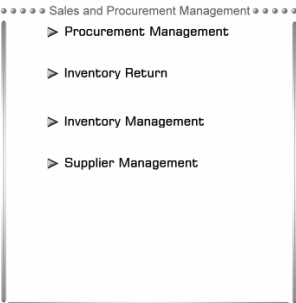

Otherwise, you can click  to save the new password

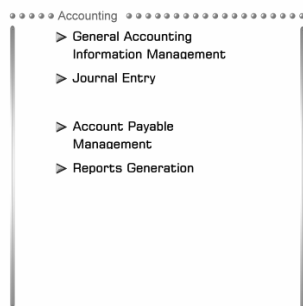

Main

When login successful, then the Main menu will appear with the authorized functions:

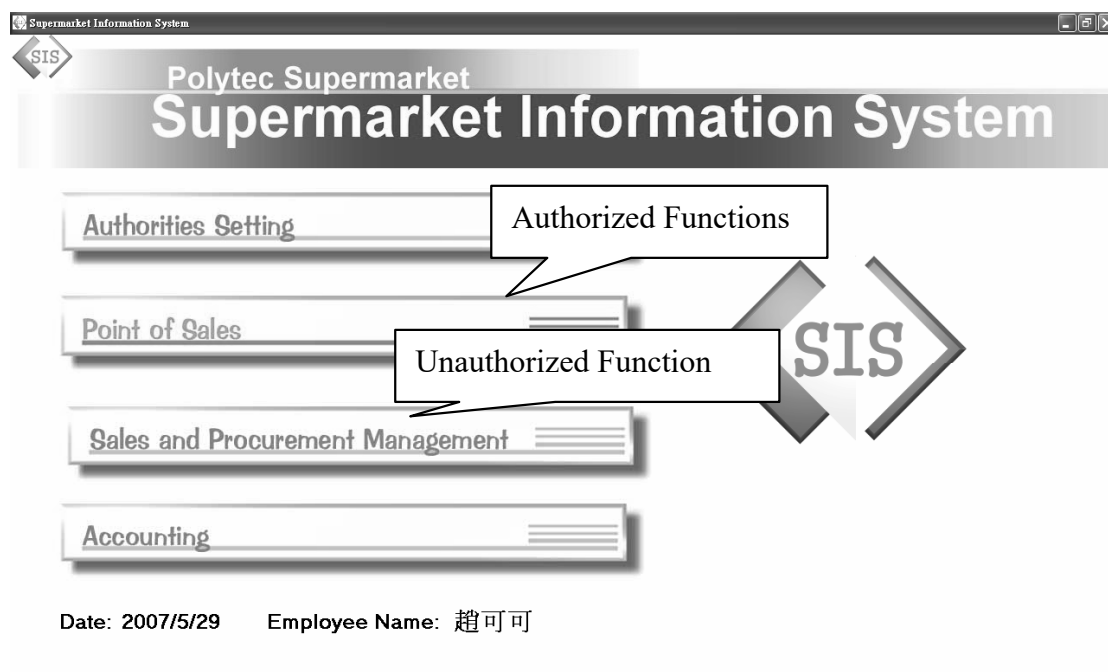

1. Click  to go to Authorities Setting Function
2. Click  to go to Point of Sales Function
3. Click  to display sub-menu of Sales & Procurement Management Function

 - • • • • Sales and Procurement Management • • • • •
 - Procurement Management
 - Inventory Return
 - Inventory Management
 - Supplier Management
4. Click  to go to Accounting

Function

The functions with grey color are the unauthorized functions and the functions with color are the authorized functions:

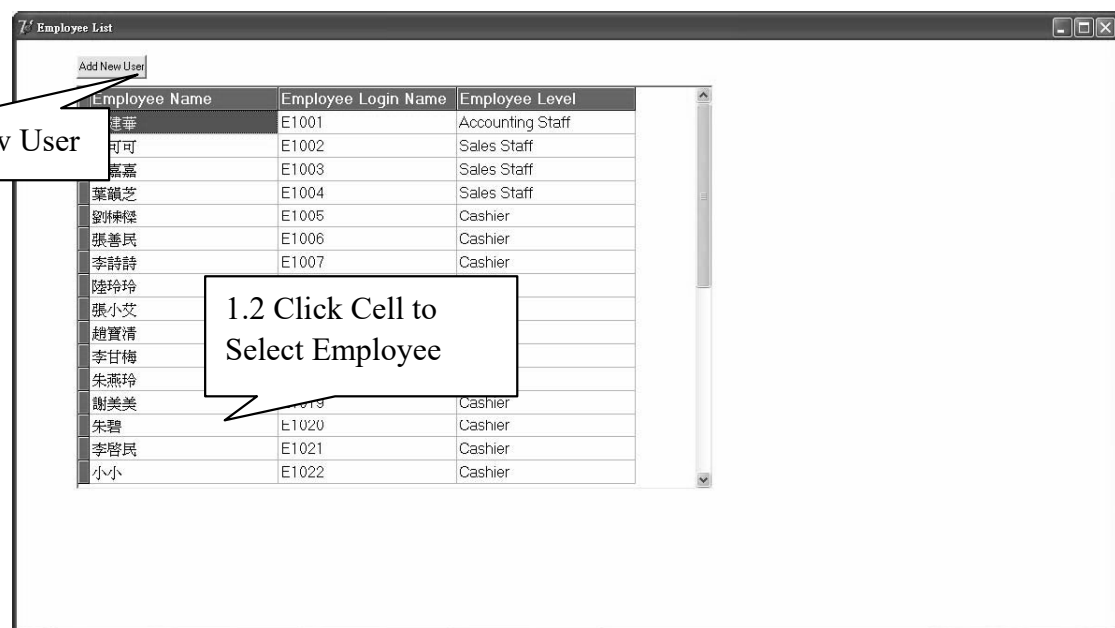

Authorities Setting Function

After click  , then the following Authorities Setting window will appear:

The Authorities Setting window has a menu bar with 'File', 'Edit', and 'Logout'. It contains an 'EmployeeID:' text box, an 'Employee Level:' dropdown menu, and three tabs: 'Point of Sales', 'Sales & Procurement Management', and 'Accounting'. The 'Accounting' tab is active, showing three sections: 'New Sales Transaction', 'Claring', and 'Sales Return', each with 'Enable' and 'Disable' radio buttons. At the bottom are 'Save', 'Reset', and 'Return' buttons. A callout box points to the 'EmployeeID:' field with the text '1. View Employee List'.

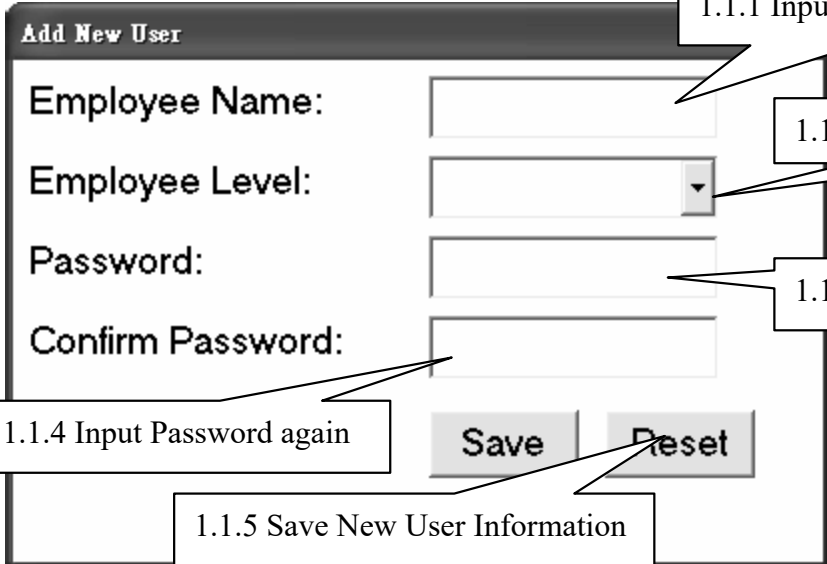

Step1: click  to view employee list

The Employee List window shows a table of employees. A callout box points to the 'Add New User' button with the text '1.1 Add New User'. Another callout box points to a cell in the table with the text '1.2 Click Cell to Select Employee'.

Employee Name	Employee Login Name	Employee Level
連華	E1001	Accounting Staff
何可	E1002	Sales Staff
嘉嘉	E1003	Sales Staff
葉顯芝	E1004	Sales Staff

Point-of-Sale System

Customers' purchases can be processed effectively and efficiently with barcode scanners. Required product data can be fetched from the database and customer receipts can be generated as a result. Real-time inventory updates can also be achieved.

Login

This interface allows you to get into the main window of Point-of-Sale

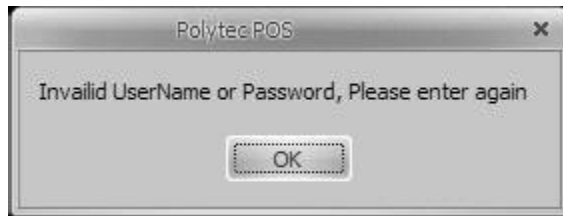

The screenshot shows a login window titled "Login". It features two input fields: "User ID:" with the text "Polytec" entered, and "Password:" with masked characters "*****". Below these fields are two buttons: "Login" and "Esc. Exit". A mouse cursor is pointing at the "Login" button.

Step 1: Type User ID

Step 2: Type Password

Step 3: Click on  to login.

If your user ID and password are incorrect, then a message box will be shown

, then you could press OK and reenter.

Transaction Processing Menu

The daily transactions are mainly performed in this window.

Sales & Procurement Management

After clicking , then the following window will appear

Procurement Management

After clicking **Procurement Management**, inventory order and Arrival Confirmation will be handled. There are three sub-functions, Add New Orders, Modify Ordered, Confirm Ordered Arrival which is shown as following:

The screenshot shows a web application titled "Procurement Management" with a menu bar containing "File", "Edit", and "Logout". Below the menu bar are three tabs: "Add New Order", "Modify Ordered", and "Confirm Ordered Arrival".

Callouts with arrows point to the tabs and form fields:

- "Go to Add New Orders" points to the "Add New Order" tab.
- "Go to Modify Ordered" points to the "Modify Ordered" tab.
- "Go to Confirm Ordered Arrival" points to the "Confirm Ordered Arrival" tab.

The main content area includes a "Purchase Record" section with the following form fields:

- Order No:
- Order Date:
- Order Description:
- Supplier Name:
- Supplier Address:
- Supplier Phone:
- Supplier Email:
- Supplier Website:
- Supplier Logo:
- Supplier Status:
- Supplier Rating:
- Supplier Address:
- Supplier Phone:
- Supplier Email:
- Supplier Website:
- Supplier Logo:
- Supplier Status:
- Supplier Rating:

Below the form fields is a button labeled "Add New Supplier".

The "Order Items" section contains a table with the following columns: ItemName, Quantity, Category, UnitCost, and TotalCost. The table is currently empty.

At the bottom of the form, there is a "Total Order Cost" field showing "0.0".

Below the table, there are six buttons arranged in two rows:

- Row 1: Add, Modify, Delete
- Row 2: Save, Reset, Back

Add New Order

When there are new orders needed to be processed, employee will record those new orders here

The screenshot shows the 'Procurement Management' application window. The interface includes a menu bar (File, Edit, Logout) and a toolbar (Add New Order, Modify Ordered, Confirm Ordered Arrival). The main form contains the following elements:

- 1. Order No.:** A text input field containing '1011'.
- 2. Order Date:** A date picker showing '2007/ 5/30'.
- 3. Select Supplier Name:** A dropdown menu for selecting a supplier.
- 4. Supplier ID:** A text input field.
- 5. Order Description:** A large text area for describing the order.
- 6. Add Inventory Items:** A button to add items to the order.
- 7. Order items:** A table with columns: Name, Quantity, Category, UnitCost, TotalCost.
- 8. Total Order Cost:** A text input field showing '0.0'.
- 9. Save Entire Order:** A button to save the order.
- (2) Modify Order:** A button to modify the order.
- (3) Delete Order:** A button to delete the order.
- (4) Reset:** A button to reset the form.
- (5) Back:** A button to go back.

Additional callouts include:

- ① Add New:** A button labeled 'Add New Supplier'.

Step 1: Order No. will be generated on each order

The screenshot shows a date picker for the month of December 1899. The calendar grid displays days from 1 to 31. The date '30' is highlighted.

Step 2: Order Date:

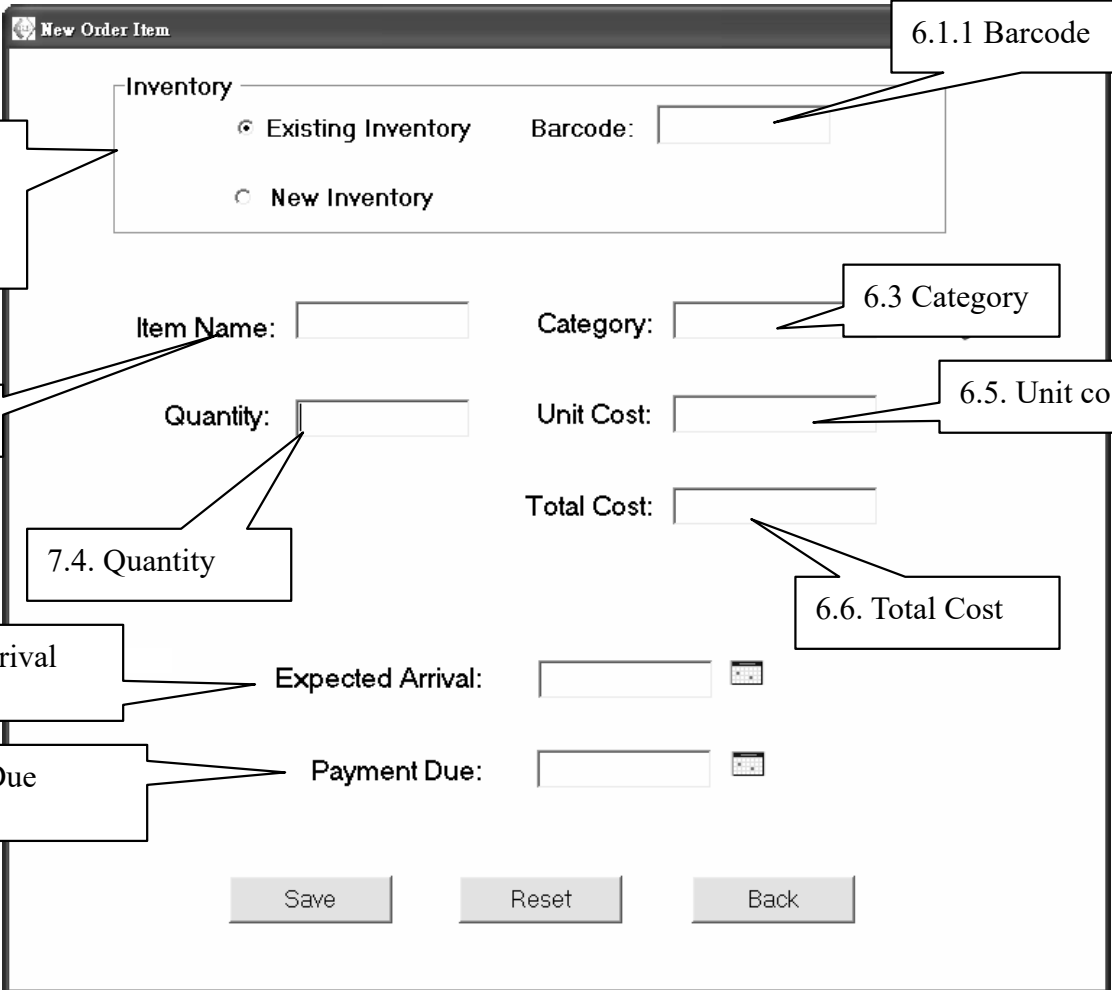

The screenshot shows a dropdown menu for selecting a supplier. The selected item is '日進食品有限公司'. Other visible options include '大豐食品有限公司', '天天食品有限公司', 'Coffee club limited', 'noodles limited', 'Fast limited', '加加電器有限公司', and '心思食品供應商'.

Step3: Select Supplier name:

Step4: After choosing the Supplier Name, Supplier ID will be generated

Step5: When there is necessary, enter the order description. This is an optional filed.

Step6: After Clicking  , the following form will be shown:

The screenshot shows a web form titled "New Order Item". It contains several input fields and buttons. Callouts point to the following elements:

- 6.1. Existing Inventory or New Inventory:** Points to the "Inventory" section with radio buttons for "Existing Inventory" (selected) and "New Inventory".
- 6.1.1 Barcode:** Points to the "Barcode:" input field.
- 6.2. Item Name:** Points to the "Item Name:" input field.
- 6.3 Category:** Points to the "Category:" input field.
- 6.5. Unit cost:** Points to the "Unit Cost:" input field.
- 7.4. Quantity:** Points to the "Quantity:" input field.
- 6.6. Total Cost:** Points to the "Total Cost:" input field.
- 6.7. Expected Arrival:** Points to the "Expected Arrival:" input field with a calendar icon.
- 6.8. Payment Due:** Points to the "Payment Due:" input field with a calendar icon.

At the bottom of the form are three buttons: "Save", "Reset", and "Back".

Step6.1: Select whether to add an order to existing or new inventory

Step6.1.1: if chose existed inventory, enter barcode here

Step6.2: If barcode is entered, Item Name will be fetched here, otherwise, enter Item Name

Step6.3: If barcode is entered, Category will be fetched here, otherwise, enter Category

Step6.4: Enter the Order Quantity

Step6.5: Enter the Unit Cost

Step6.6: Total Cost will be generated automatically after entered Quantity and Unit Cost

Step6.7: Click ☐ 今天: 2007/5/29 to choose an Expected Arrival date

Step6.8: Click ☐ 今天: 2007/5/29 to choose a Payment Due Date

Step6.9: Click to save the order item.

Step7: When there is new order item added, there will be new record generated

Order Items

ItemName	Quantity	Category	UnitCost	TotalCost
珠江牌鼓油	20	調味料	4.5	
大享牛奶	25	飲品	7.3	
菜刀	10	煮食用具	35	

Step8: Total Order Cost will be generated according to all the items entered.

Order Items

ItemName	Quantity	Category	UnitCost	TotalCost
珠江牌鼓油	20	調味料	4.5	90

Step6: After Click

Confirm

, the following screen will be shown:

Step6.1: The confirmed order details will be shown automatically

Step6.2: If the confirmed order item is an existing inventory, barcode will be generated, otherwise, users need to scan the barcode for the new item here.

Step6.3: Enter the Expiry Date of the arrived inventory.

Step6.4: Enter the expected alarm days before the inventory expiry

Notes: there will be a pop up window to remind users when the specific inventory is going to expiry

Step6.5: Click  to create inventory expiry record

Notes: since there may be more than one expiry date from the same order, user can re-enter the expiry date for the same orders, i.e. start from Step7.3 to Step7.5

Step6.6: Receive ID will be generated for the receive record

Step6.7: Click  今天: 2007/5/29 choose the receive date

Step6.8: Enter the Receive Quantity here

Step6.9: Remain Payment will be generated here automatically according to the Receive Quantity and Return Amount*.

* Return Amount will be illustrated in Step7.10

Step6.10: When the order record is selected, the system will check whether there is any return (because of expiry or broken etc.) from the Supplier.

If there is inventory return, the following screen will be shown

The screenshot shows a web application interface for 'Inventory Return Status'. The form includes several input fields and radio buttons. Callouts point to the following elements:

- 7.10.1 Return or not⁺**: Points to the 'Return this time' radio button.
- 7.10.2 Return ID⁺**: Points to the 'RetrunID' field, which contains the value '1'.
- 7.10.3 Supplier ID⁺**: Points to the 'Supplier ID' field, which contains the value '1004'.
- 7.10.4 Total Return Amount⁺**: Points to the 'Total Return Amount (\$)' field, which contains the value '60'.
- 7.10.5 Return Amount⁺**: Points to the 'Return Amount (\$)' field, which contains the value '0'.

The form also includes a 'Return Next time' radio button and a 'Cancel' button at the bottom.

Step6.10.1: Choose ☐ Return this time or ☐ Return Next time to determine whether to return or not

Step6.10.2: Return ID will be generated for return record this time

Step6.10.3: Supplier ID will be generated

Step6.10.4: Total Return Amount will be generated by adding all the return amount from the same supplier

Step6.10.5: After an agreement to the supplier, user can enter the return amount. The return Remain Payment in Step7.9 will automatically deduct the payment in this order arrival.

If no inventory return, the following screen will be shown:

Inventory Return Status

No Inventory Returned

ReturnID: 1

Supplier ID: 1001

Total Return Amount (\$):

Return Amount (\$):

Step6.10: there is a message shown that “No Inventory Returned”.

Step7: Click  to Sales & Management Procurement Function

(a) 

Click  to save all the information

(b) 

Click  to clear all the information

(c) 

Click  to Confirm Arrival

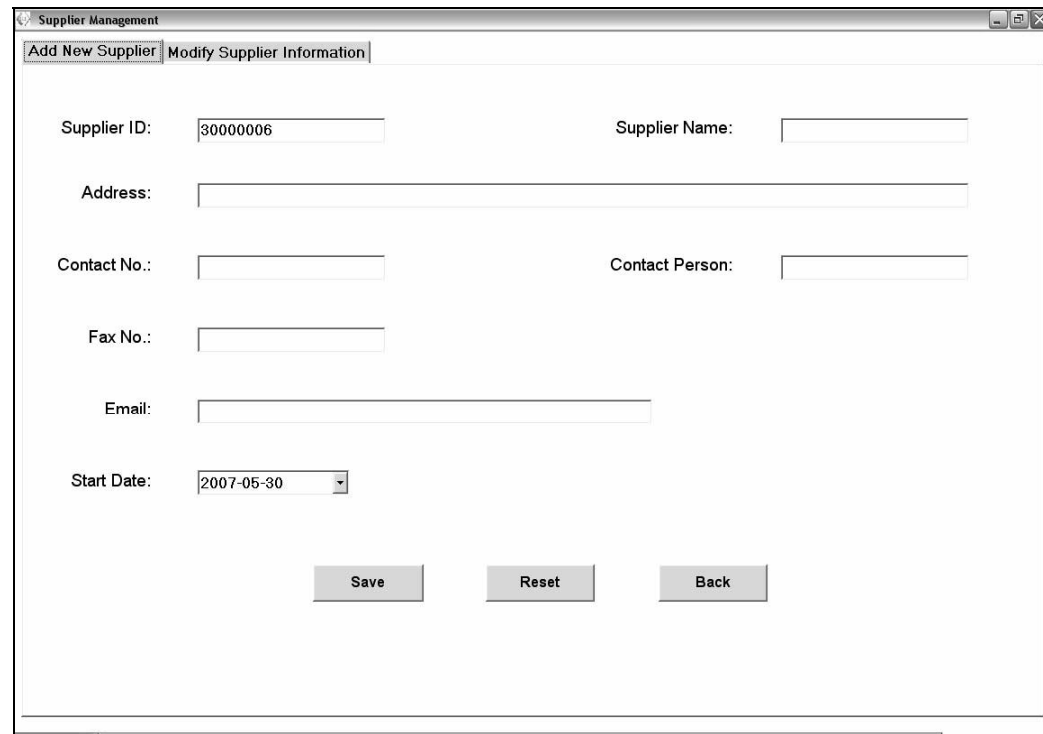

① 

Clear all the Search keys, Supplier Name, Order Date, Category, and Barcode

Supplier Management Function

Users can manage the supplier information by adding and modifying.

Add New Supplier

The screenshot shows a web application window titled "Supplier Management". It has two tabs: "Add New Supplier" (selected) and "Modify Supplier Information". The form contains the following fields:

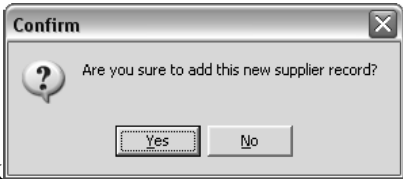

- Supplier ID: 30000006
- Supplier Name: (empty text box)
- Address: (empty text box)
- Contact No.: (empty text box)
- Contact Person: (empty text box)
- Fax No.: (empty text box)
- Email: (empty text box)
- Start Date: 2007-05-30 (dropdown menu)

At the bottom of the form are three buttons: "Save", "Reset", and "Back".

When there is a new supplier, users must add the information of that new supplier.

Step 1: input all the information needed of the new supplier. (the supplierID is automatically created.)

Step 2: , save the new supplier record in the database.

Step 3: a Confirm box  will show up, click "Yes" for confirmation the saving.

If one field is empty, this message box  will be displayed to remind you.

Modify Supplier Information

You can modify existing supplier record.

The screenshot shows a web application window titled "Supplier Management". It has two tabs: "Add New Supplier" and "Modify Supplier Information", with the latter being active. The form contains the following fields and controls:

- Supplier ID:** A dropdown menu.
- Supplier Name:** A dropdown menu.
- Search:** A button located between the Supplier ID and Supplier Name dropdowns.
- Address:** A text input field.
- Contact No.:** A text input field.
- Contact Person:** A text input field.
- Fax No.:** A text input field.
- Email:** A text input field.
- Start Date:** A date picker showing "2007-03-13".
- Buttons:** "Save", "Reset", and "Back" buttons are located at the bottom of the form.

Step 1: choose the supplier that you want to modify by selecting the supplier ID

This image shows a close-up of the "Supplier ID" dropdown menu. The list of options is:

- 30000001
- 30000002
- 30000003
- 30000004
- 30000005

or by supplier name.

This image shows a close-up of the "Supplier Name" dropdown menu. The list of options is:

- amy
- connie
- candice
- T&T
- Tom

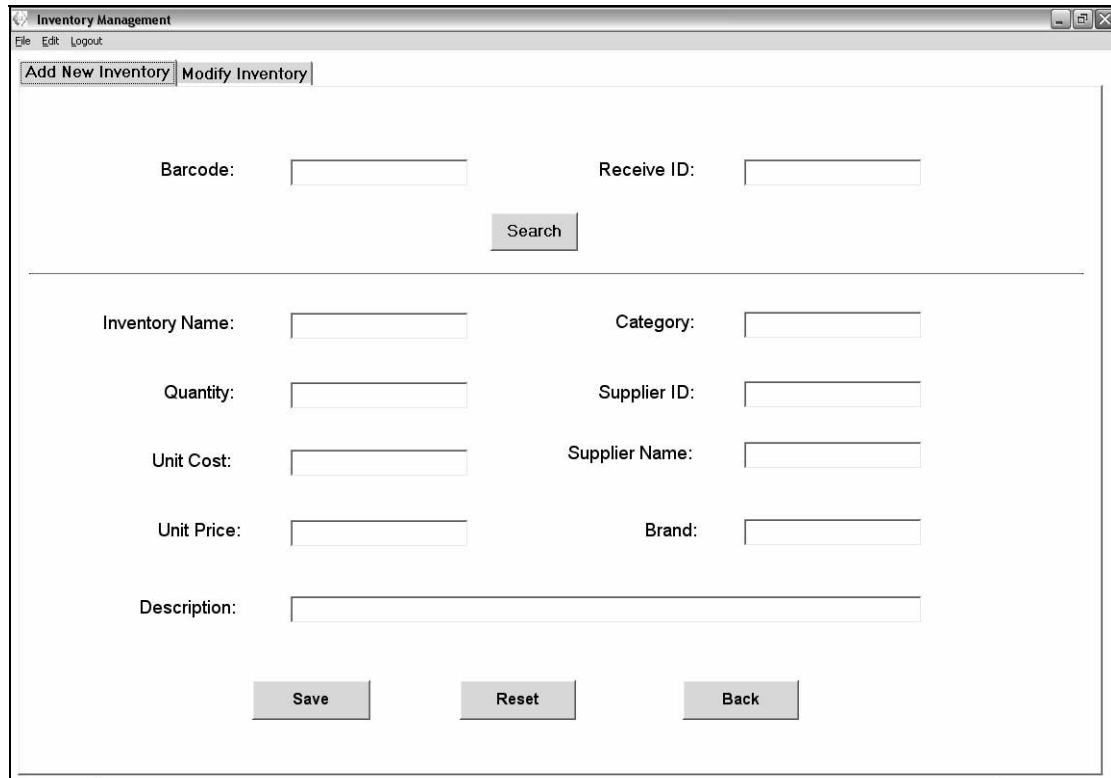

Step 2: click **Search** to find the record of the supplier chosen.

Step 3: change the information needed. (You can not change the start date)

Step 4: click **Save** to save the changes of supplier record in the database.

Inventory Management Function

Users can manage the inventory information by adding and modifying.

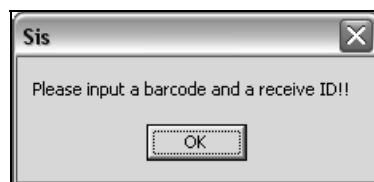

The screenshot shows a web application window titled "Inventory Management". It has a menu bar with "File", "Edit", and "Logout". Below the menu bar are two tabs: "Add New Inventory" (which is selected) and "Modify Inventory". The main content area contains several input fields and buttons. At the top, there are "Barcode:" and "Receive ID:" labels, each followed by a text input field. Below these is a "Search" button. A horizontal line separates this section from the next. Below the line, there are "Inventory Name:", "Quantity:", "Unit Cost:", "Unit Price:", and "Description:" labels, each followed by a text input field. To the right of these are "Category:", "Supplier ID:", "Supplier Name:", and "Brand:" labels, each followed by a text input field. At the bottom of the form are three buttons: "Save", "Reset", and "Back".

Add New Inventory

When there is a new inventory record that didn't exist in the database, users must add the information of that new inventory.

Step 1: input the Barcode and Receive ID of the new inventory and click  to search the record.

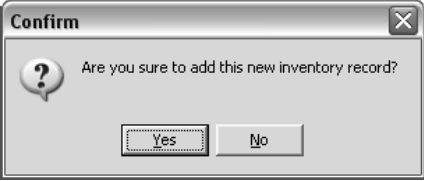

If no barcode or Receive ID input before clicking , this message box

will be displayed to remind you.

Step 2: input all the fields of new inventory record.

Step 3: , save the new inventory record in the database.

Step 4: a Confirm box will be shown up , click “Yes” for confirmation the saving.

If one field is empty, this message box  will be shown to remind you.

Modify Inventory Information

You can modify existed inventory record.

The screenshot shows the 'Inventory Management' application window with the 'Modify Inventory' tab selected. The window contains several input fields and buttons:

- Barcode:** A text input field with a 'Search' button next to it.
- Supplier ID:** A text input field.
- Brand:** A text input field.
- Category:** A dropdown menu.
- Search:** A button located below the Supplier ID and Brand fields.
- Reset:** A button located below the Search button.
- Searched Result:** A table area for displaying search results.
- Modified Inventory:** A table area for displaying modified inventory records.
- Buttons:** 'Modify', 'Delete', and 'Back' buttons are located at the bottom of the window.

Step 1: you can search the inventory record by barcode, supplier ID, category or Brand. By barcode (or supplier ID, or Brand), you can simple input the value, click  to search for the inventory. By category, you can choose the category in the list.

If no record is found, this message box will be shown.

The screenshot shows the 'Inventory Management' application window with the 'Modify Inventory' tab selected. The 'Barcode' field is filled with '1002'. The 'Search Result' table is populated with one record:

barcode	inventoryName
1002	coke light

The 'Modified Inventory' table is empty. The 'Search', 'Reset', 'Modify', 'Delete', and 'Back' buttons are visible at the bottom of the window.

Step 2: select the inventory that you want to modify in the “Search Result”, click

Modify

, then the Inventory Modification form will be shown up.

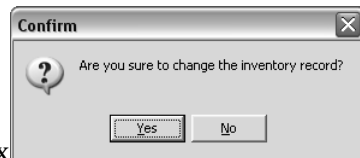

The 'Inventory Modification' form contains the following fields and values:

Field	Value
Barcode	1002
Inventory Name	coke light
SupplierID	30000001
Supplier Name	Tom
Category	Wine
Brand	coca cola
Unit Cost	1.2
Price	3
Description	less sugar

Buttons at the bottom: Save, Reset, Back.

Step 3: change the information of this inventory.

Step 4: click **Save** to save the changes of supplier record in the database.

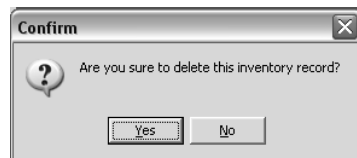

A 'Confirm' dialog box with the text: 'Are you sure to change the inventory record?'. It has 'Yes' and 'No' buttons.

Step 5: a Confirm box will be shown up, click “Yes” to confirm the saving.

Delete Inventory Information

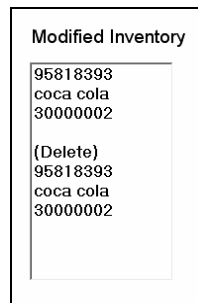

Step 1: You can delete existing inventory record by clicking **Delete**.

A 'Confirm' dialog box with the text: 'Are you sure to delete this inventory record?'. It has 'Yes' and 'No' buttons.

Step 2: a confirm box will be shown up, click “yes” to confirm the saving.

After modifying or deleting any inventory record, changes will be recorded in the

A list titled 'Modified Inventory' showing the following entries:

95818393
coca cola
30000002
(Delete)
95818393
coca cola
30000002

“Modified Inventory”

Inventory Return Function

Users can manage the inventory return information.

Add New Inventory Return Record

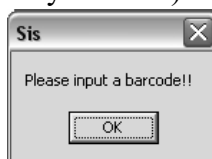

When an inventory is being returned, users must add new inventory return record to the database.

The screenshot shows a web application window titled 'InvReturn'. It has two tabs: 'New Inventory Return' (active) and 'Inventory Return History'. The 'New Inventory Return' tab contains a form with the following fields and controls:

- Barcode:** A text input field.
- Return ID:** A text input field containing the value '20000007'.
- Search:** A button located below the Barcode field.
- Inventory Name:** A text input field.
- Supplier ID:** A dropdown menu.
- Supplier Name:** A text input field.
- Unit Cost:** A text input field.
- Quantity:** A text input field.
- Reason of Return:** A dropdown menu.
- Total Cost:** A text input field.
- Return Date:** A date picker showing '2007-05-31'.
- Buttons:** 'Save', 'Reset', and 'Back' buttons are located at the bottom of the form.

Step 1: input the barcode of returned inventory and click  to search the inventory record. (Return ID is automatically created.)

If no barcode is input, this message box

will be shown.

Step 2: Choose the supplier of returning inventory, enter the quantity that need to

return, and choose the reason of return

If you choose “Other” for the reason a specify reason in the text field.

, you need to enter

If choose “Others” for the reason but no specify reason entered in the text field, this

message

will be shown to remind you.

Step 3: Click

to save the inventory return record.

This message box

will be shown, if there are any empty text fields.

This message box

will be shown to confirm the saving. If

confirm, click “Yes”.

View Inventory Return History

Users can view inventory return history.

Accounting Function

General Accounting Information Management

After clicking **General Accounting Information Management** the following window will appear:

The screenshot shows a web application window titled "General Accounting Information Management". It features two tabs: "Add New Account" and "Manage Existing Account". The "Add New Account" tab is active, displaying a form with the following fields: "Category" (a dropdown menu), "Account Name" (a text input field), "Entry Type" (radio buttons for "Debit" and "Credit"), "Initial Debit Value" (a text input field), "Initial Credit Value" (a text input field), and "Memo" (a text area). A legend indicates that an asterisk (*) refers to fields that must be filled in. At the bottom of the form are three buttons: "Save", "Reset", and "Back". Two callout boxes are present: one pointing to the "Add New Account" tab with the text "Go to Add New Account", and another pointing to the "Manage Existing Account" tab with the text "Go to Manage Existing Account".

Add New Account

The screenshot shows a web application window titled "General Accounting Information Management". It has two tabs: "Add New Account" (active) and "Manage Existing Account". The form contains the following fields and controls:

- 1. Select Category:** A dropdown menu.
- 2. Input Account Name:** A text input field.
- 3. Select Entry Type:** Radio buttons for "Debit" and "Credit".
- 4. Input Initial Input Value:** A text input field for "Initial Debit Value".
- 5. Enter Initial Credit Value:** A text input field for "Initial Credit Value".
- 6. Input Memo for Account:** A large text area for "Memo".
- 7. Click Here to Save:** "Save", "Reset", and "Back" buttons.

Callout boxes with numbers 1 through 7 point to these respective elements.

Step1: Select Expense **account category**

Step2: Input account name Salary

Step3: Select entry type ☒ **Debit** ☐ **Credit**

Step4: Input initial debit value Initial Debit Value: 0

Step5: Input initial credit value Initial Credit Value: 0

Step6: Input memo for the account Memo: Salary Account for Staff
